Definition of Done: Heads Up Poker

Definition of Done (Tasks)

- Code checked into repository (Github)
- Code reviewed for standards compliance
- Code reviewed by team member or Walk-through performed
- External/Public API documented Unit test definition complete
- Unit tests run without error
- Non-functional tests (e.g. usability, performance) passed
- Regression tests run without error
- Static code analysis performed and passed
- Test coverage measured and achieved
- Code follows style guides

Definition of Done (User Stories)

- A user can complete the user story successfully
- A user error does not crash the program
- A user can complete a user story without being confused on how to do so
